A Letter From The Executive Director

by Darlene Barber

Dear Friend for Life,

When I read the details of abortionist Kermit Gosnell's trial in Philadelphia, so many emotions run through me: horror, sorrow, anger; to name a few.

As you may know, Gosnell has been on trial for the murder of seven children, born alive after his botched late-term abortions; and for the murder of a mother, one of his "patients." Those who went to Gosnell's offices likely made their choice because they felt as if they were out of hope; just like so many who turn to abortion centers.

So as I run through all of the emotions, one sticks with me: determination. "Not on our watch," is the phrase that comes to mind. My dream is that one day soon, *not one* woman in our area will ever be so hopeless as to choose to end a pregnancy. For that matter, no men will see this as an option for their children, either.

Our goal is that *Women's First Choice Medical* will be

more visible, more prepared and more *determined than ever* to be the first choice for those in this difficult situation. And when they choose us first, the likelihood of their turning to an abortion center decreases.

We now know that Gosnell will never be free to commit atrocities again since he was just convicted and given three life sentences. But there is another way to shut down the Kermit Gosnells of this world; of which there are more than we might imagine: we can close down their abortion centers by turning their potential clients toward hope, toward *Women's First Choice Medical* and the 2,500 other organizations and ministries like ours across our land.

Join us. Let's build hope. Let's show the love of God to those who are without hope. One day, soon, we will be that first choice for all. And when that happens, abortion centers across the country will have nothing to do. And our nation will be celebrating *life* once again.
